TEST COMMENTS:

Central Iowa saw disease pressure this year, and our Waterloo plot was not spared. Tar spot and southern rust were noted in the plot. Following planting, heavy rains delayed the first herbicide pass, which resulted in this plot emerging into standing rye cover strips. After the rye was successfully terminated, the plot took off and saw timely rains and good heat. Thanks to Rottinghaus Farms for hosting this plot. One replicate was dropped in the full season test due to yield variability.
