TEST COMMENTS:

Grand Ridge proved to be an excellent location again this year. This site was planted at the end of April in ideal soil conditions with good moisture, which led to excellent emergence and a beautiful plot. While June turned out a bit drier than preferred, the soil in this location was able to hold onto enough moisture to get the plants to the next rainfall. Foggy mornings helped with the lack of moisture, but may have hurt the pollination on the fuller-season hybrids. This plot showed excellent stalk quality and standability with abundant, well-filled ears. The foliar diseases common in the area were present here as well; however, they were effectively managed with a fungicide application at brown silk.
