TEST COMMENTS:

All I can say is WOW, another outstanding Illinois FIRST location that absolutely produced some great yields! This site was planted in wonderful soil conditions on cultivated bean stubble with great emergence. Most of the growing season was ideal, though it did get some hail at V2. Rains were timely; however, some spotty pollination did occur. August was sporadic with rain events, but some cooler temperatures at night helped to relieve some stress. There were some absolute clubs for ears in this plot, with most shorter season hybrids filled to the brim with only minor tip back in the fuller season. Excellent stalk quality and standability at this location were helped by the Veltyma application at R1 and the excellent farm management by Jared.
