TEST COMMENTS:

This site was planted in mid-May in ideal conditions, and the moisture and heat helped this site get off to a great start. This location is well-managed with great fertility and drainage. Good moisture during pollination helped fill ears to the tip with lots of 18 and 20 around ears. The plants were very healthy and standing well at harvest. It was very dry later in the growing season, but didn't seem to affect yield much.
