<b>PEST &amp; DISEASE RISK:</b>	Fusarium*

### TEST COMMENTS:

*This was a strip-till site (following a rye cover crop) planted in mid-May. Soils were warm at planting with adequate moisture, which helped with quick emergence. Above-average rain during May and July led to good growth and ideal pollinating conditions. The plot was healthy at harvest and a bit on the wet side. There was very little kernel disease present, thanks to a fungicide application at brown silk.*
