### TEST COMMENTS:

*This was a no-till plot planted into rye on May 12th. Planting conditions were favorable with good soil moisture, and rainfall shortly after planting supported quick, even emergence. Rainfall was near average through most of the season until late August, when conditions turned fairly dry. By harvest, the plot appeared healthy with only mild tar spot pressure that didn't seem to affect yield. No weed pressure or lodging was observed. A great performing plot overall!*
