TEST COMMENTS:

This location was planted in ideal soil conditions. There was good emergence and early-season vegetative growth across this location, which made for a good-looking plot. Timely rains early on and a few stray showers in late summer helped some of the fuller season varieties fill out. Small amounts of white mold were seen in a few areas of the plot, but overall it was fairly clean. The plants were standing very nicely with good pod sets and medium/large seed size. The dew the morning of harvest gave some much-needed moisture to the seed samples.
